

## **North American Workshop On Sustainable Consumption and Production (SCP)**

November 6 - 7, 2008

George Washington University Law School, 2000 H Street, NW Washington DC

The workshop will be organized by the United Nations Environment Programme and the governments of Canada and the United States in collaboration with the United Nations Department of Economic and Social Affairs.

The purpose of the meeting is to assess the North American approach to sustainable consumption and production, building on the many efforts already underway in government, business and communities. Participants will include a select group of senior experts and stakeholders in the U.S. and Canada, from government, academia and think tanks, industry and trade associations, and NGOs. Ideas generated from this event will provide valuable input for the UN Commission on Sustainable Development, when this body addresses a 10-year framework on SCP in 2010 - 2011.
